Summary

I'm looking for a developer position. I have been coding my own projects (Two portfolio websites and a web app) until now and want to develop my skills further in a professional environment. I'm confident I can build responsive, beautiful websites. I would make a great front-end or full stack web developer, as I have experience with Javascript frameworks in the front end as well as Node.js in the backend.

Project Highlights

Portfolio

Found at: danxue.herokuapp.com
Built with React/ES6/HTML5/CSS3/SASS

Another Portfolio

Found at: danxue-portfolio.herokuapp.com
Built with React/ES6/HTML5/CSS3/SASS

Another Portfolio

Found at: danxue-portfolio2.herokuapp.com
Built with React/ES6/HTML5/CSS3/SASS

EthRiddle

Found at: ethriddle.herokuapp.com

A web application using Ethereum for guessing the answer to riddles and winning payouts. It uses Ethereum to verify answers to riddles and hold/distribute payouts and is just a privacy solution away from being beyond functional. It currently includes chat and search features. It can be used if Metamask is pointed to the Ropsten testnet.

Front end is React/Redux/ES6/Web3.js/HTML/CSS/Bootstrap

Back end is Node/Express/solidity/truffle

An earlier version was built with jQuery and PHP

Education

Attended McGill University (<120 credits)

Basic knowledge of algorithms, data structures, discrete math, functional programming, command line interfaces

Very basic knowledge of Java, C, Python, computer architecture

Miscellaneous

I'm somewhat knowledgeable about blockchains and Ethereum in particular
